| Water volume can be regulated      |          | ■ |
| Drip nozzles                       | Piece(s) | 5 |
| ■ included in the scope of supply. |          |   |

### Water volume can be regulated

- Targeted, need-based watering of plants.

### Integrated needle in the collar

- Installation without the use of tools.

### Fixation on the Kärcher Rain System® hose

- Flexible, precise mounting.

## COMPATIBLE MACHINES

- Drip Nozzle
- Hose Connection Set
- Hose Spike
- Hose Stop
- I - Connector
- KRS pot watering set
- Kärcher Rain Box
- Kärcher Rain System® hose
- Micro Spray Nozzle
- Micro Sprayer Set
- Particle filter
- Pressure Reducer & Particle Filter
- Sealing Collar
- Soaker Hose
- Soaker Hose Set
- T - Connector with Water Flow Regulation

| SensoTimer ST 6 ecologic                 | 1  | 2.645-213.0 | The intelligent water timer SensoTimer ST 6 ecologic is based on the water demand of the plants and waters in a moisture-controlled manner with the help of a radio sensor.                      | <input type="checkbox"/> |
| SensoTimer ST 6 Duo ecologic             | 2  | 2.645-214.0 | The intelligent water timer SensoTimer ST 6 Duo ecologic is based on the water demand of the plants and waters in a moisture-controlled manner with the help of 2 separate radio sensors.        | <input type="checkbox"/> |
| <b>KÄRCHER RAIN SYSTEM®</b>              |    |             |                                                                                                                                                                                                  |                          |
| Particle filter                          | 3  | 2.645-225.0 | The particle filter reliably protects the Kärcher Rain System® from dirt particles. The filter inlay can conveniently and easily be removed and cleaned.                                         | <input type="checkbox"/> |
| Pressure Reducer & Particle Filter       | 4  | 2.645-226.0 | The pressure reducer with filter reduces the input pressure from max. 12 bar to an optimal 4 bar for the Kärcher Rain System®. The filter protects the Kärcher Rain System® from dirt particles. | <input type="checkbox"/> |
| Kärcher Rain System® hose                | 5  | 2.645-227.0 | The Kärcher Rain System® hose supplies the Kärcher Rain System® with water. Various adjustable application components can be attached directly onto the hose.                                    | <input type="checkbox"/> |
| Soaker Hose                              | 6  | 2.645-228.0 | The 25-m long trickle hose is perfect for the efficient watering of hedges and bushes thanks to the even output. The hose can be extended to 50 m.                                               | <input type="checkbox"/> |
|                                          | 7  | 2.645-229.0 | The 10-m long trickle hose is perfect for the efficient watering of hedges and bushes thanks to the even output. The hose can be extended to 50 m.                                               | <input type="checkbox"/> |
| T - Connector with Water Flow Regulation | 8  | 2.645-231.0 | The T-piece with regulation connects 3 Kärcher Rain System® hoses or soaker hoses. The lateral tee is adjustable and perfect for connection of the soaker hose.                                  | <input type="checkbox"/> |
| I - Connector                            | 9  | 2.645-232.0 | The I-piece connects two Kärcher Rain System® hoses or soaker hoses. Using the I-piece, the soaker hose, for example, can be connected to the Kärcher Rain System®.                              | <input type="checkbox"/> |
| Hose Stop                                | 10 | 2.645-233.0 | With the end piece, the Kärcher Rain System® hoses and the soaker hoses can be sealed securely. It is mounted at the end of the respective hose without the use of tools.                        | <input type="checkbox"/> |
| Drip Nozzle                              | 11 | 2.645-234.0 | The drip collars with integrated needle can be attached at any point on the Kärcher Rain System® hose. The adjustable dripper enables direct watering of plants.                                 | <input type="checkbox"/> |
| Sealing Collar                           | 12 | 2.645-235.0 | Sealing collars can be attached at any point on the Kärcher Rain System® hose. They can be easily installed and reliably seal collar holes that are no longer required.                          | <input type="checkbox"/> |
| Micro Spray Nozzle                       | 13 | 2.645-236.0 | Spray collars with integrated needle can be attached anywhere on the Kärcher Rain System® hose. The adjustable Micro Sprayer can be adjusted as required.                                        | <input type="checkbox"/> |
| Hose Spike                               | 14 | 2.645-237.0 | The ground spike is used for laying and fixing the Kärcher Rain System® hoses and the soaker hoses. The integrated rubber ring on the attachment point ensures an optimal grip.                  | <input type="checkbox"/> |
